Intel Drop #22 - FTX Collapse, Election Fraud & More

"An election can easily be rigged by carefully changing a few votes and a few outcomes, and now you have the scenario you want."

Intel Drop #22 - FTX Collapse, Election Fraud & More

November 11, 2022

A quick reminder, every link you need for our materials and articles is right here.

Please ***share*** this article, so we can keep spreading the word. Join our Telegrams here (group, announcements, news, spiritual discussion). Join **Bill's Twitter here, his Gab here, and the official We Are Sovereign Twitter here.** Check the bottom of this post for important notes.

The following was collated from a few wide-ranging conversations covering many topics. As always, these conversations are edited by Michael for clarity and for obfuscation purposes (see: Stylometry):

Part 1 - The Crypto Markets

Bill: Something that made the news was this collapse of FTX. I'd barely heard of it, then found out it was the second biggest exchange in the world. Do you know what's going on here?

Gideon: ***"Yes, everything that occurred was cover for an extraordinary transfer of crypto into USDR. We still do not know how much, but it was in the tens of Billions."***

Bill: So it's not really bankrupt?

Gideon: ***"It is bankrupt in fiat terms, yes. But Sovereigns, cabal members, institutional investors gained a stunning amount of USDR, while average users were fleeced of all their crypto and left with nothing. All of this was carefully planned. You have to realize, the cabal rewards theft. If a Sovereign steals fiat, and then puts it into CSRQ, that is something approved by the cabal."***

Bill: What do you know about this Sam Bankman-Fried? He's the owner of FTX and connected to the WEF.

Gideon: ***"He is a high-level Sovereign and cabal member. What is being said of him in the news is typical propaganda and misdirection at this point, so that should be ignored. His job was to move large institutional cabal funds into USDR. For example, Sequoia just wrote off a $210 Million investment into FTX. They did not lose it. It was moved into USDR. Do you think an investment firm of that size would so casually write off such a large sum without any fuss?"***

Bill: No, I don't. So they got something out of it?

Gideon: ***"Of course. Not only did they gain USDR, they can plausibly walk away from FTX as if nothing happened and not explain anything that went on internally in terms of the funds supposedly lost. The same occurred with Luna. All of the supposed lost funds went into USDR, and that will never be disclosed."***

Bill: It does seem like there are these huge losses in crypto, or funds stolen out of exchanges, sometimes Billions, and then you hear nothing of it. Are those cases of crypto being put into

USDR?

Gideon: ***"Over the past year, yes. Before, in preparation for it. An exchange losing Billions to some theft or hack is so unlikely, you need to assume it was an inside job. Most of the time, it is. They will continue doing this, because the reward is USDR, and there is no punishment at all for stealing fiat. In fact, it is encouraged. We believe toward the very end, all of the exchanges will steal everyone's crypto."***

Bill: Yeah, you told me that, you said you think Coinbase will just come up with some nonsense and steal everything.

Gideon: ***"FTX just stole everything and will probably get away with it. The others will do the same, just not yet. But one by one, expect more stories like FTX. It is all for the purpose of acquiring USDR and preparing for CSRQ. Crypto plays a key role."***

Bill: I can see how the average person just has no idea what's going on behind the scenes. Everything they do is always misdirection. So you think something is happening in one way, but that's not really what's happening.

Gideon: ***"What people read and see in the news is manipulated. It is a narrative. It may contain a sprinkling of truth, but it rarely represents what is actually going on. The cabal will sacrifice their own, demonize their own publicly, when those are the very people running the operation demonizing themselves. The cabal will pretend something bad happened, when it was good for them. The cabal will say the SEC is going to investigate something, when the SEC itself is involved in the actual crime."***

Bill: Do you see Bitcoin dropping more? I hear people say it could go to $5,000 or less. Wouldn't that be pretty bad for Bitcoin?

Gideon: ***"It would be. That is because the miners could not be profitable any longer. The entire blockchain would just stop and transactions would not go through. This is the ultimate demise of Bitcoin they are planning. That does not mean it may not still go up in value. We do not fully know their plans. We just know the crypto markets are extremely manipulated, and everything is being done to utilize them to enable USDR acquisition."***

Bill: Some people don't understand why the cabal wants to use crypto to get USDR. Some people asked me why they don't just make USDR out of thin air, like fiat. Can you talk about that?

Gideon: ***"USDR and the future digital currency system will not be based on fiat principles, or money printing. The cabal is going to cap USDR's supply. It appears they want the supply to correlate to the precise fiat funds Sovereigns covert into USDR. That is a very important point. Once this process is done, that will be the final supply. USDR will be something defined by the generational wealth placed into it by Sovereigns from the former fiat system. It appears the cabal wants it to represent that. "***

Bill: Ok, I see. Almost symbolic?

Gideon: ***"We are not sure if it is that, or an accounting mechanism. I tend to see it as a way for the cabal to assign a value to each Sovereign, which is to say they can look at a Sovereign's total USDR wealth and determine their level of success in the pre-fiat world. In other words, if a Sovereign has a lot of USDR, it means they had a lot of success during fiat times. That could even mean they were successful at theft, fraud and stealing, all things the cabal approves of. If they have a smaller or moderate amount, it means they are a less successful Sovereign. We believe a hierarchy will be built around this. "***

Bill: Is this why you said so many Sovereigns, especially the newer ones, were rushing to make a lot of fiat and turn it into USDR?

Gideon: ***"Yes, it appears that way. They must know about this hierarchy, or know having a lot of USDR is going to be a representation or symbol of your status in the post-Reset world, as a Sovereign."***

Bill: Oh, ok, that makes a lot of sense to me. A lot.

Gideon: ***"They do not want to just print USDR out of thin air. They are moving to a new system, Bill. It is one based on the principles of Bitcoin. Bitcoin is their creation. They will wipe it away and destroy it at some point, but many of those principles will appear within USDR."***

Bill: Won't destroying Bitcoin harm the cabal?

Gideon: ***"Not at all. It will just harm smaller investors and miners. Some of those mining companies are run by the cabal, so they will be prepared and ready when Bitcoin drops in price and seizes up. The cabal will likely time this with CSRQ coming online. When Bitcoin seizes up and does not work anymore, you will know CSRQ is very close."***

Bill: What about Ethereum? It's proof of stake now, so I assume it's not going to seize up.

Gideon: ***"It will continue to function because they merged it, and the cabal loves it. Of course, they did that to save it, but did not for Bitcoin, which is hopelessly doomed. We think post-Reset they will use it extensively. The average Common person, though, will have no access to it."***

Bill: What about all the Commons and their small allotment per month?

Gideon: ***"How do you mean?"***

Bill: I guess I'm just trying to understand it better. Would it be like everyone getting a tiny fraction of a Bitcoin per month, then it expires if not used?

Gideon: ***"Yes, precisely."***

Bill: The whole economy will transform over this. What do you see being done now so that this functions and works?

Gideon: ***"Consolidation. That is key. Fewer companies, more central control. A few major tech companies to control the world, a few major oil, gas and coal companies, a few restaurant and food companies. A few media companies. All of them run by Sovereigns. We are already there."***

Bill: We sure are. I've seen some of these info-graphics that show who controls what, and with the food supply, it's just a couple of companies!

Gideon: ***"It is. Now, there are thousands of small businesses and small companies, too. When CSRQ comes online, they will be choked out of existence. They will have some options, though, to join a conglomerate or be absorbed. All of that literature will be prepared for them. This is how small businesses will be handled. Some will just go under, others will allow themselves to be acquired. The cabal wins, either way."***

Bill: What about all these layoffs at Meta and Twitter? What's going on there?

Gideon: ***"They are making room for those currently working on CSRQ right now to join these companies. The whistle blowers described all of this to me. The whistle blowers expect, after their work is done on CSRQ, they will be offered very high-level jobs at***

companies like Meta, to continue their work. So when you see that, you see the cabal just preparing for CSRQ. They want the people who are working in the fusion centres on CSRQ to be ready to join these companies when CSRQ comes online.

The layoffs also represent removing redundancies and staff who will have no use for them post-Reset. They may also be staff they identified as not trained enough, possibly not intelligent enough to carry out the more rigorous demands of CSRQ's implementation. Many of the tech companies employ people who are better suited to be working at Starbucks. So the cabal is making some big changes in preparation, they are essentially cleaning house."

Bill: I get a lot of questions about pensions and retirements. People still just don't get it, and can't wrap their heads around this. Can you explain how that will work?

Gideon: ***"Almost everyone will be Common class and get the same per month. Everything else will be wiped out or not exist. Including debt and ownership of property. Pensions and social security will be gone."***

Bill: Ok, people seem to think they won't be able to survive. Please explain that again.

Gideon: ***"They will be able to survive. The cabal is not intending to create economic chaos with CSRQ, they are intending to create a Communistic system of control. Rationing, social status credits and vouchers will become more normal. Price controls will be put in place. Everyone will have enough. This is why they say you will own nothing and be happy. They are not going to make everyone homeless, Bill. You will just have to compromise all of your principles to exist in this system."***

Bill: I see all these events happening, all of it confirms CSRQ, all of it is happening as you've said. What's weird is I feel this sense that we're weeks away from this, but also years away at the same time.

Gideon: ***"The year they want it to come online is 2023. We have a lot of time and many events to pass until then. If they wanted to, it could be brought online right now, but not without a lot of problems. They are not quite ready."***

Part 2 - The Mid-Term Elections

Bill: The U.S. Midterms seemed to favor the Democrats, so what happened this time?

Gideon: ***"When you rig an election, you do not need to rig every vote or every outcome. People seem to mistakenly believe this. They assume every vote must be compromised. This is not true at all. An election can easily be rigged by carefully changing a few votes and a few outcomes, and now you have the scenario you want. So they got what they wanted. Likely control of the Senate or a tie, fewer House seats lost than expected, and even a trans-person won a state seat in Montana."***

Bill: A trans-person won a seat in Montana? I need to look this up. Yes, it appears so. This world is just more upside down than ever. Here's an article saying more LGBTQ people ran for office than ever before.

Gideon: ***"The election was a success for the cabal so far. The GOP only had a few victories, and under-performed overall, at least in terms of the false numbers being shown. There is also extensive fraud in Arizona and Nevada. It will be a question of whether the fraud centers such as Phoenix and Las Vegas can overwhelm the non-fraudulent votes in areas the cabal does not have rigged. It is possible because the Red Wave was more intense than expected. Of course, this is not reflected in the final result, because of the extensive fraud. This gives the media a chance to produce narratives about how poorly the GOP did."***

Bill: What about Texas and Florida? Seems like the GOP did really good there.

Gideon: ***"Yes, but both states are unimportant as it pertains to the Presidency. The Democrats can win without them. From this point looking forward, it appears the cabal wants Democrats in power well into the future. If a Republican somehow gets in the White House again, I would be surprised, but if it does happen, they will be a Sovereign. The cabal can change the narrative any time the wish."***

Bill: What about all of these people endorsed by Trump who lost? Were they bad candidates? Did Trump actually cause some harm?

Gideon: ***"There are two candidates who stand out as poor choices, and those are Dr. Oz and Doug Mastriano in Pennsylvania. Both candidates were weak for different reasons. The GOP should have won those races. Poor or bad candidates do make a difference. The cabal does not need to rig things as much with candidates like that. Hershel Walker in Georgia is also not a good choice, but it is not clear Trump specifically chose him, he just happened to win the primary. So, some of Trump's choices were questionable, but not all of them."***

Bill: People are saying Trump is harming the GOP. What do you think?

Gideon: ***"While Trump ultimately serves the cabal's agenda, his brand, this creation of the MAGA movement, is actually a better alternative to what the GOP used to represent, with people like Mitt Romney or George Bush. So when people complain, they should think about what the GOP would actually return to. Anyone wishing for such a thing should think long and hard about what they are wishing for."***

Bill: Trump is always sounding the alarm about the rigged elections. Doesn't that hurt the cabal?

Gideon: ***"He is still telling people to vote in a system he says is rigged, so it is nonsensical. He is proposing to run for President in a system he says stole an election from him. So while he is saying one thing, he does another, and endorses a rigged system by continuing to participate in it. He should be calling for paper ballots and hand-counts and the removal of all electronic voting systems, but I have not heard him say this."***

Bill: Yeah, I Tweeted about that. Canada uses paper ballots, it seems like there's less controversy there. Anyway, it's hard to see him as a Sovereign, but he is one. In what sense do you think he is one? Is he a top cabal member or they just made him Sovereign to keep him on a leash?

Gideon: ***"He does things that indicate to me he is using very advanced cabal manipulation tactics, then there are other instances he strikes me as naive, as someone who always has cabal members around him and he ends up trusting the wrong people. It is hard to tell and my information on him is not extensive."***

Bill: Do you know if Trump has been involved in these rituals they do or killed anyone?

Gideon: ***"I have no information on that one way or another."***

Bill: What's America's future now?

Gideon: ***"The eventual annihilation of the U.S. Dollar, leading to bedlam there."***

Bill: Won't people blame and hate Biden and the Democrats for that?

Gideon: "*They have already put the country in a recession and the fabric of modern society there is slowly coming unglued, yet the media says Biden is beloved and the the term 'inflation' isn't real. So the cabal will just invent the narrative and tell people what to believe. The same happens in Communist countries."*

Part 3 - Dreams & Other Topics

Bill: We were going to include this in the previous Intel Drop, but we'll just continue the discussion here. We talked a lot about this a few weeks ago. After Intel Drop 20, all these people came to me telling me they were having strange dreams, right after reading Intel Drop 20. Thing is, I also had some odd dreams, too.

Gideon: *"They were seeing the number 844."*

Bill: Yes.

Gideon: *"That is an angelic message and number."*

Bill: It was amazing to me that two separate people gave me that number.

Gideon: *"It is. Describe the nature of some of the dreams."*

Bill: Well, some reported being in bed and water was flowing over them, but not in an uncomfortable way. They felt like it was cleansing them. They described light beings around them.

Gideon: *"That is a wonderful dream to have. It means they were being renewed by angels."*

Bill: I had a dream where I was at the WEF and overheard a conversation between some WEF members. I woke up and remembered a lot of it, and felt compelled to write it down, so I did. I showed it to you. For our people reading, what's the significance?

Gideon: *"The dream is not a dream. You travelled astrally. We know this because of what was said in the conversation you overheard. It appears it is a real conversation that took place."*

Bill: I really felt that. It did not feel like a dream. It felt like I was there. I heard a date, then you confirmed for me it is one of the dates.

Gideon: ***"The date is one of the exact dates I was given. It is impossible for it to be a dream."***

Bill: Can I at least reveal some of the other things I heard them say?

Gideon: ***"You may."***

Bill: They talked about some new medical terms, some terms I didn't know. Nothing about viruses. It was like he was describing a device he wants used, that they plan to use. One person seemed especially happy, excitable. Another was nodding in approval, but kept looking away. They were smiling though, a lot, but they were devious smiles. I felt like they were demonically-possessed. They looked like nasty people to me. Other people were around. It looked like a party, maybe one after a WEF event. They were nodding at friends walking by, but speaking quietly to each other.

Gideon: ***"They are talking about something that is going to be used post-Reset. It is a device that will connect to the brain. It will be marketed or shown as a gaming device, or virtual reality connector. As with almost everything the cabal does, they will say it does one thing, when it really does another. If you use it, you will get some extra social score credits. I believe they were happy because it must do something with the brain and soul connection, something they had been working a long time to do."***

Bill: I see. I can see that. It fits with the dream. They also said some other things, things I thought might be about us. So I shared that with you. Since other people are having these, should they write them down? Should they tell us? I had one person who had a dream, showing all of us Sovereigns in the future fighting CSRQ. It was really hopeful. It sent it to you.

Gideon: ***"If they feel it is important, they should do so."***

Bill: So why did this happen after Intel Drop 20? Well, I know why, I'll let you say it.

Gideon: ***"Because we revealed some very important things in that drop that the cabal did not want people to hear. Reading it, just by reading it, it opened you up to angelic intervention. The cabal knows if we do this again, if we proceed with Part 3, which we have talked about so much, it will empower our people and those who support us. So we expect the attacks against us to intensify."***

Bill: I'm still getting threats. Just got another email today. It never stops. The hate and toxicity never ends with these people. It's like a mixture of agents and some just misguided idiots, really angry for some reason.

Gideon: "*If a person hears information they do not like, they will look for ways to denigrate the messenger, find ways to criticize them. So this is common. What we have revealed would be a shock to people, especially the more spiritual aspects. We also exposed so many gatekeepers, so people who follow those people may be upset. They still want to believe in them, Q Anon leaders, or maybe Trump. They want to believe in them so badly, they hate seeing us expose them, so they hate us. Finally, hearing that all of your money will soon be worthless, that is hard to accept, too."*

Bill: Someone said Alex Jones' book on the Great Reset was really good. I think maybe they felt like that makes him good, too. But we know he's compromised. So how do we explain this to people?

Gideon: "*Gatekeepers tell the truth all the time. But they also omit the truth, use advanced manipulation techniques, and sometimes pepper their information with lies. That is all that is needed. The cabal does not care if they are telling the truth, Bill. It should also be noted how much Alex Jones backed away from his previous comments on Sandy Hook. He still lost in court, despite backing down. He should have stood strong. He never should have backed down. So that should instruct us."*

Bill: It instructs me that he doesn't have the balls to fight when it matters, because Sandy Hook is top to bottom a total load of bullshit.

Gideon: *"Correct, he does not. It was a fight that mattered, and one he lost in spectacular fashion."*

Bill: One thing that concerns me, and this is a bit off topic, but it's that a couple of our Sovereigns don't seem to understand what it means to be Sovereign or the process. As I told you, one of them attacked us. What they were upset about was not a big deal, but they didn't understand something, so they misinterpreted things. After explaining things, then they understood. I'm really worried about this, because an agent can just manipulate them so easily.

Gideon: *"I have given you some pointers on how to explain things better. And yes, an agent can easily manipulate them, so we will have a more detailed warning about this is in the November email."*

Bill: How do you feel about our Sovereigns right now? Do we have a handle on the one who betrayed us? Do you want to talk about that?

Gideon: ***"The situation was resolved, but we lost contact with them. I am looking into it. My conclusion is, they have simply walked away. An agent deceived them. Our concern was they would work against us, but it appears they are not. They just walked away. They are still Sovereign in CSRQ."***

Bill: I don't think they appreciated the work that as done for them. One of our other Sovereigns helped them out so much, and they didn't even thank that person. It didn't seem fair to me at all.

Gideon: ***"It is not fair, but there is nothing we can do. We hope no other Sovereigns attempt such a thing, whether it be out of selfishness, greed or some other misguided intention."***

Bill: I think we've done a great job explaining the process. We know they're good people. They're all Quarantined or Restricted. But my feeling is, some are getting manipulated by agents.

Gideon: ***"They are. The agents are fishing, contacting anyone they can, probing, trying to befriend our people. This is on-going. We will issue more warnings. The risk is not just to our Sovereigns, it is to all of us. So if one Sovereign is a weak link, they are putting us all at risk, they are putting the whole group at risk. Their actions could harm others."***

Bill: I wish they got that. It's borderline just selfish what they are doing, but it's just, well, it's two. Two out of dozens isn't too bad. I wish it was just not anyone. I just hate that this one person gets to keep their Sovereign status. I wish we could take it away.

Gideon: ***"We can, but it presents too much of a risk. The whistle blowers said there could be questions as to why they are changing a status back, in this case, it would be to Quarantined, as is always done if a Sovereign loses their status, they always are changed to Quarantined. It is so rare it is done. So it would be reviewed. We cannot risk anything being reviewed or flagged."***

Bill: I understand. We just have to move on, and hope this person just goes away.

Gideon: ***"We are not here to retaliate. We are here to minimize risk and if there is threat, to neutralize it in the most peaceful way possible. If a Sovereign has an issue, I ask they come to us first and discuss it. There is probably a simple explanation if they do not understand something."***

Bill: It would be nice if people could see what we will do for people and that we'll bend over backwards to help, but we don't talk about it. I wish we would defend ourselves more, but you said in the end, we have to walk away from this public stuff.

Gideon: ***"Our Sovereign team is what matters. I know you want the Intel Drops to continue, because you want to inform people, but if the agent attacks and risks are too much, we will put us and our team first. We will go dark."***

Bill: I see why you want to do that. I just have this need to want to tell the world what's going on and inform them. I'll take your lead on that, of course.

Gideon: ***"Good, thank you. Now is not the time, but soon."***

Bill: There's other stuff that worries me. I had one person who filled out the questionnaire write me a few times, complaining we never contacted them. But we did. We found the email we sent, weeks ago, and they never checked their spam folder. A lot of people also filled out the questionnaire but input the wrong email, pretty clearly misspelled or the wrong domain typed in. It's moments like this I can see why all this is easy for the cabal. Our people don't even follow the instructions we give.

Gideon: ***"Decades of mind-control, brainwashing, manipulation by the media, poisons in our food and water, electromagnetic pollution, all of this has an impact on IQ and mental acuity. I am sure the people responding are well-meaning, but mistakes like that do not help us or our cause, or help them, for that matter."***

Bill: I see it everyday. Everywhere. I don't know how the world even functions at this rate.

Gideon: ***"Greater reliance on computers and automation. Without that, Bill, modern civilization would begin to crumble by now, because the average person in the West is so dysfunctional. The cabal is now ready to make the full transition, to a dystopian technostate, where people become combined with machine and A.I., and totally controlled by the cabal."***

Bill: It's a big discussion that we need to get into more, maybe for the next Intel Drop, just what this post-Reset world will be like.

Gideon: ***"We can do that."***

Bill: You revealed something to me about the cabal's technology. It's chilling. It worried me more than the drones, because I feel like with the drones there's probably something that can be done to stop them, like a homemade microwave gun. But this thing you told me, no way to stop it. It's horrible. Should we save that for later or talk about it now?

Gideon: ***"Later, and it should be shared with only our Sovereigns. We should not be revealing key intel to the public because it does us no good at this point to do so. It serves us nothing, other than to alert the cabal to things we know."***

Bill: Got it. Ok, thanks for your time again and we'll talk soon.

Gideon: ***"Goodnight."***

Update: We are building a team. We will need people we can rely on and coordinate with from all over the world. **To join us, you can fill out our anonymous questionnaire here.**

Update: We continue to see serious problems with email. Emails like MSN, Me, iCloud, Outlook, AOL, Gmail, Gmx, Yahoo, Hotmail, Comcast and many others routinely BLOCK and CENSOR our emails. These email providers are also known to read your emails and offer no security at all. No one should be using them, but many people who contact us are using them. We recommend opening an anonymous account using Proton.me or Dnmx.org. Both of these providers have proven they do not block our emails.

Don't forget to subscribe to this JustPasteIt and give us an *up vote* and *share* this article on social media.
